I really love this unit, I have tried other types of units for EMPF , this one I find myself totally comforted by. Sleep is so important to everything, and to know I can rest is a real treat.

Thank you!

My RBH hasn't improved but I will be watching for that in the future. I do feel & sleep way better, and I feel I now have recourse if I have a bout of insomnia, by switching to sleep mode 3 or 4... so I am comforted

Resting Breath Hold (RBH) almost never fails to improve during first week. If RBH failed to improve or got worse (even more rare), please read your RBH instructions (contained in the email this blank Rebate form was attached) and carefully redo the RBH test. Usually a reduction can be tracked to a failure to oxygen load consistently with the past RBH test.
