Paul,

I'm faxing the results of my use of the Earthpulse for the last 90 days, I hope it helps in your ongoing Stats for the device, I used it religiously for the 90 days on Recover Mode, missing maybe 1 or 2 days, including using it for specific areas of my body.

Unfortunately I think I have to return it since I did not have the results I expected. According to the numbers, I got an 8% increase in my RBH, even though it went down from the start. I do take many supplements, including an excellent Multi in Reliv(recommended by cancertutor.com by the way), and many others, including starting Organic Sulfur a couple of weeks after starting the Earthpulse. I can't thank you enough for recommending this stuff, it has literally de-aged me 5 years, and I know because with everything else that I take, including trying to eat better, it has had a very noticeable effect. Organic Sulfur is going to be a permanent part of my regiment. So thanks for inventing this device, and I hope it helps many other people.

I'm going to keep researching these kinds of devices including the Bob Beck Protocol, and the Rife Machine (check out the Spooky2 at www.cancerclinicz.com, a very affordable Rife device).

Yours,

Pat Colucci

Resting Breath Hold (RBH) almost never fails to improve during first week. If RBH did fail to improve (or got worse which is even more rare), please re-read your RBH test instructions (in the same email this document was attached to. Usually a reduction can be tracked to a failure to oxygen load consistently with the past RBH test, or taking under different conditions.

Comments: Please write as much as you would like in the space below. PARTICULARLY HELPFUL WOULD BE YOUR COMMENTS ON ANY CHANGES IN NUTRITIONAL SUPPLEMENTATION OR MEDICATION DURING THE TIME OF YOUR 90 DAY TRIAL. The page will continue down as necessary. Call for technical support if you have any questions. Contact numbers are at end of this document. Thank you!
