

I have not paid much attention to the RBH because I feel so good as a result of using the EP, I was not even expecting to hold my breath for over 3 minutes but am happy that I did.

I like to look after my health and try to avoid junk food & meat, and have tried a lot of supplements over the years and I have a few that I stick to that I have found are good, plus I like to exercise etc but I think that the EP is one of the best things that I have ever used or practiced to maintain and improve my health. It is better than I ever expected. I work long hours and have never been a morning person as I used to feel washed out in the mornings but now I feel great all day even though now I find I am taking less sleep because I feel so much better than before. I think if I feel this good now how much better would I feel if I got a regular 6 or 7 hours sleep a night/day.

Thanks for your product I will be recommending it to others, in fact when I am able to get some funds together I will be buying myself another one and I will be buying them as gifts for others I know.

Resting Breath Hold (RBH) almost never fails to improve during first week. If RBH did fail to improve (or got worse which is even more rare), please re-read your RBH test instructions (in the same email this document was attached to. Usually a reduction can be tracked to a failure to oxygen load consistently with the past RBH test, or taking under different conditions.
