**Resting Breath Hold (RBH) almost never fails to improve during first week.** If RBH did fail to improve (or got worse which is even more rare), please re-read your RBH test instructions (in the same email this document was attached to. Usually a reduction can be tracked to a failure to oxygen load consistently with the past RBH test, or taking under different conditions.

**Comments:** Please write as much as you would like in the space below. The page will continue down as necessary. Please use the device nightly during the first 90-day period (don't loan it out!!!) to maximize your statistical probability and level of success. Call for technical support if you have any questions. Contact numbers are at end of this document. Thank you!
